CONTENTS OF VOLUME 18

NUMBER 1, FEBRUARY 1987

Special Issue: Animal Memory and Cognition.
Edited by Edward A. Wasserman and Steven F. Maier

FOREWORD	iii
GAIL B. PETERSON, DANIEL LINWICK, AND J. BRUCE OVERMIER. On the Comparative Efficacy of Memories and Expectancies as Cues for Choice Behavior in Pigeons	1
THOMAS R. ZENTALL, JOYCE A. JAGIELLO, PAMELA JACKSON-SMITH, AND PETER J. URCUIOLI. Memory Codes in Pigeon Short-Term Memory: Effects of Varying the Number of Sample and Comparison Stimuli	21
E. A. WASSERMAN, R. S. BHATT, D. L. CHATLOSH, AND R. E. KIEDINGER. Discrimination of and Memory for Dimension and Value Information by Pigeons	34
MARK E. RILLING AND JULIE J. NEIWORTH. Theoretical and Methodological Considerations for the Study of Imagery in Animals	57
RON WEISMAN AND LAURENCE RATCLIFFE. How Birds Identify Species Information in Song: A Pattern Recognition Approach	80
WILLIAM S. MAKI. On the Nonassociative Nature of Working Memory	99
RALPH R. MILLER AND LOUIS D. MATZEL. Memory for Associative History of a Conditioned Stimulus	118
ANTHONY A. WRIGHT AND MICHAEL J. WATKINS. Animal Learning and Memory and Their Relation to Human Learning and Memory	131

NUMBER 2, MAY 1987

DAVID R. SHANKS. Acquisition Functions in Contingency Judgment	147
ROBERT ST. CLAIRE-SMITH. Interaction of the Effects of Overshadowing and Reinforcer Devaluation Manipulations on Instrumental Performance	167
TERRY L. DEVIETTI, ROBERT L. BAUSTE, GARY NUTT, OWEN V. BARRETT, KEVIN DALY, AND ALLEN D. PETREE. Latent Inhibition: A Trace Conditioning Phenomenon?	185
STEVE REILLY AND TODD R. SCHACHTMAN. The Effects of ITI Fillers in Autoshaping	202
FRANS VAN HAAREN, ANNEMIEKE VAN HEST, AND NANNE E. VAN DE POLL. Acquisition and Reversal of a Discriminated Autoshaped Response in Male and Female Rats: Effects of Long or Short and Fixed or Variable Intertrial Interval Durations	220

NUMBER 3, AUGUST 1987

CHARLES A. EDWARDS AND WERNER K. HONIG. Memorization and "Feature Selection" in the Acquisition of Natural Concepts in Pigeons	235
WILLIAM S. TERRY. Food Priming and Short-Term Retention in the Delayed Alternation Task	261
R. G. WEISMAN, R. BRUCE, AND R. J. BENINGER. Simple and Conditional Discriminations in Rats: The Effects of Delays and Scopolamine	274
R. C. HONEY, TODD R. SCHACHTMAN, AND GEOFFREY HALL. Partial Reinforcement in Serial Autoshaping: The Role of Attentional and Associative Factors	288
LEANN LIPPS BIRCH, LINDA MCPHEE, B. C. SHOBA, LOIS STEINBERG, AND RUTH KREHBIEL. "Clean Up Your Plate": Effects of Child Feeding Practices on the Conditioning of Meal Size	301

NUMBER 4, NOVEMBER 1987

ACKNOWLEDGMENTS	iii
JENNIFER LAMARRE AND PETER C. HOLLAND. Transfer of Inhibition after Serial Feature Negative Discrimination Training	319
TODD R. SCHACHTMAN AND STEVE REILLY. The Role of Local Context in Autoshaping	343
STEPHEN B. KLEIN, TERRY BECKER, DONISE BOYLE, DOUGLAS KRUG, GARY UNDERHILL, AND ROBERT R. MOWRER. The Influence of Context and UCS Intensity on the UCS Preexposure Effect in a Flavor Aversion Paradigm	356
J. TANNER, J. N. P. RAWLINS, AND J. H. MELLANBY. Manipulation of CS-US Conditional Probability and of the CS-US Trace Interval on Conditioning to the CS and to a Background Stimulus in a CER Situation	371
ROBERT A. ROSELLINI, DONALD A. WARREN, AND JOSEPH P. DeCOLA. Predictability and Controllability: Differential Effects upon Contextual Fear	392
GEORGE R. KING AND A. W. LOGUE. Choice in a Self-Control Paradigm with Human Subjects: Effects of Changeover Delay Duration	421
AUTHOR INDEX FOR VOLUME 18	439

INFORMATION FOR AUTHORS

Learning and Motivation publishes original experimental papers addressed to the analysis of basic phenomena and mechanisms of learning and motivation, including papers on biological and evolutionary influences upon the learning and motivation processes. Studies involving either animal or human subjects are invited. Publication in *Learning and Motivation* is subject to the Editor's judgment that inclusion will make a substantial contribution to our understanding of basic principles of learning and motivation and to general behavioral theory. Monographic reports of an integrated series of experiments, as well as papers reporting a single experiment will be published. Preference is given to longer, more substantive papers.

All manuscripts should be submitted to the Editor: **Dr. Steven F. Maier, Department of Psychology, Campus Box 345, University of Colorado, Boulder, Colorado 80309.**

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Learning and Motivation* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Format and style of manuscript should conform to the conventions specified in the *Publication Manual of the American Psychological Association* (1200 Seventeenth Street N.W., Washington, D. C. 20036; 3rd ed., 1983), with the exceptions listed below. Please note that it is the responsibility of the author that manuscripts for *Learning and Motivation* conform to the requirements of this journal.

Form. Type at least double-spaced throughout (including tables, footnotes, references, and figure captions), with the original typescript on one side of a good grade of $8\frac{1}{2} \times 11$ inch white paper, with 1 inch margins on all sides. Mimeographed or duplicated manuscripts will be accepted *if they are indistinguishable from good typed copies*.

Authors must submit four (4) complete copies of the manuscript. Each copy *must* include all figures and tables, although only the ribbon copy need include glossy prints. Authors desiring "blind" reviewing of their manuscript must submit two (2) complete copies and two (2) copies free from identifying information.

Number the pages consecutively. *Page 1* should contain the article title, author(s) name(s), and affiliation; at the bottom of the page type a short title not exceeding 35 characters and spaces, and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods with units of measure that are abbreviated (cm, s, kg, etc.) in text or in tables. Pages 75-79 of the *Publication Manual* describe the use of the metric units of physical measurement required.

The use of acronyms should be restricted to those already commonly appearing in the literature and in any case kept to a minimum.

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number equations consecutively, with the number placed in parentheses to the extreme right of the equation. Refer to equations as Eq. 3 or simply (3), except at the beginning of a sentence, when the word Equation should be spelled out. Punctuate equations to conform to their place in the syntax of the sentence.

Apparatus. Because manufacturers' catalogs often are not readily available, especially in foreign countries or after a number of years, authors are asked to provide the specifications of their apparatus units, etc., and to avoid description by reference to manufacturer's item number.

Results and Statistics. *Learning and Motivation* does not require the use of statistics. Statistics, however, are often an *aid* to interpretation, but they are just that and do not constitute the main findings. The effects of the experimental manipulations should be clearly stated in sentence form with reports of statistical tests cited, as appropriate, in a supplementary fashion. Authors choosing to use statistical tests are encouraged to (a) state their rejection region at the outset and thereafter omit explicit *p* values for each comparison, indicating only whether or not the comparison is significant by the stated criterion, and (b) report measures of the degree of association between the independent variable(s) and the dependent variable(s), e.g., omega squared (ω^2 ; *Psychological Bulletin*, 1973, **79**, 391–395). Statistical test values are to be enclosed in parentheses and are to be of the following general form: ($F(2, 27) = 9.63$).

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use Arabic numbers 1, 2, etc. In the text, refer to footnotes by superscript 1, 2, etc. The first footnote, unnumbered, should give the source of support, the address for reprint requests, and any changes of addresses for authors.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout, on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered *a*, *b*, etc., at the end of the table. For further information, see the *Publication Manual*, pages 83–94.

Illustrations. All illustrations are considered as figures, and *must be supplied in finished form* on $8\frac{1}{2} \times 11$ or 8×10 paper, ready for reproduction. Pages 94–105 of the *Publication Manual* describe concisely the proper preparation of line drawings and photographs. Illustrations in color can be accepted only if the authors defray the cost.

Plan figures to fit the proportion of the printed page (allowing for the legend under the figure), and take care that lettering on the original is large enough to be legible after an appropriate reduction. Author(s) name(s) and figure numbers should be lightly penciled on the reverse side.

Number the figures with Arabic 1, 2, etc., in order of mention in the text. Supply descriptive legends (captions) for all figures. Type these (double-spaced throughout) consecutively on a separate sheet of paper.

References. Cite references in the text by surname of the author, followed by year of publication.

Smith (1982) found that . . .

Contrary results (Brown, 1983) have been . . .

When a reference has two authors, cite both names, as (Harris & Cooper, 1980). When more than two are involved, cite the surnames of all authors, with the date, at first mention, but in subsequent citations of the same reference give the surname of the first author followed by "*et al.*" and the year, as

(Colberg, Matthews, & Cooper, 1983)

(Colberg *et al.*, 1983)

first mention in text

second mention in text

In citing more than one publication by the same author or authors in the same year, add suffixes *a*, *b*, etc. after the year, as (Smith, 1982a), and repeat the letter identification in the bibliography, at the end of the reference.

Under the heading REFERENCES, arrange all literature citations from the text in alphabetical order according to the surname of the first author. Do not abbreviate journal names; write them out in full according to the form followed by *Psychological Abstracts*. Further information on literature citations may be found on pages 107–133 of the *Publication Manual*.

The following examples show style of capitalization and punctuation for journal articles, books, and edited books:

Zellner, D. A., Rozin, P., Aron, M., & Kulish, C. (1983). Conditioned enhancement of human's liking for flavor by pairing with sweetness. *Learning and Motivation*, **14**, 338–350.

Watkins, M. J., & Peynincioglu, Z. F. (1982). A perspective on rehearsal. In G. H. Bower (Ed.), *The psychology of learning and motivation: Advances in research and theory* (Vol. 16). New York: Academic Press.

Lloyd, P., & Beveridge, M. (1981). *Information and meaning in child communication*. New York: Academic Press.

[Use underline for journal names and book titles only.]

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. Fifty reprints will be supplied free of charge. Additional reprints can be ordered on the form accompanying the proofs.
